C S H Central State Hospital

Excellence in Evaluation, Treatment, Protection & Disposition

Information Technology Specialist II
Programmer/Analyst

Central State Hospital has a unique opportunity for an individual with an interest and experience in computer programming, system design, and database administration to join our staff as an Information Technology Specialist II. This position will provide support and development of client / server and web based, healthcare related, application systems. This will include interfacing with end users to develop and implement system requirements, systems analysis, and system design studies. Projects vary in nature, design, and complexity and require communication with all levels of facility staff.

This position requires demonstrated work experience using the Visual Studio .NET Suite, database administration and design experience with Microsoft SQL Server 2000, and design and deployment experience with Crystal Reports 9.0. Applicants should possess a strong level of knowledge and experience in using object oriented programming techniques. Applicants should possess strong knowledge and development experience in Visual Basic .NET, HTML and ASP. Development experience in a production environment and healthcare information systems is preferred. Applicants must possess a strong team ethic, a willingness to learn, and the ability to train others. Associate Degree related to Information Technology or combination of equivalent education and experience is strongly preferred. Microsoft certification(s) preferred.

An extensive criminal history background investigation and employment references will be conducted. Announcement # 1081A5; Pay Band 5 - hiring range ($35,695 to $48,000). This position will remain open for a minimum of five workdays or until positions are filled. Resumes may accompany but will not substitute for a completed State Application Form (DHRM 10-012).
